For over 30 years, We are proud of providing energy to all over the World...

As an Akış Sistem, We completed lots of Energy projects in different countries especially in Middle East countries and Russia Federation. We are one of the Turkey's leading energy company.

We have been maintaining our design, project, production and sales activities in 15.000 m² area in Polatlı Organized Industrial Zone. Our modern factory carries out its energy need from the solar energy.

Our energy adventure has started in 1987 on an area of 20 m² and today, It continues in an area of 15.000 m² factory which can produce its own energy.

- Our Supports
 - Technical Support
 - Technical Informations / Product Catalogues / Product Certificates
 - Product Documentation
 - Useful Softwares / Calculators
 - Preparing an Offerings / Submittals / Project Drawings

- Our Solutions
 - Energy Solutions: Water Treatment Plants, Waste Water Treatment Plants, Energy Plants, Medium Voltage Distribution Systems

 - Automation Solutions: Programmable Industrial Automation & Scada, Synchronisation

 - Production Solutions: Low Voltage Internal Electrical Panels, Low Voltage External Electrical Panels, UL Type Low Voltage Electrical Panels, Synchronisation Panels

- Services
 - Industrial Automation
 - Electrical Distribution
 - Energy Production (Synchronisation System)
 - Solar Energy

- **Certificates**
 - Akış Sistem Co. ISO 9001 Certificate
 - Design Registration Certificate
 - Akış Sistem Brand Registration Certificate
 - Sogen Solar Brand Registration Certificate

- **Our policy**

- **Quality Policy**

Our priority is to ensure that our customers are satisfied with the services and the products offered by our company. Firstly, offer and sample project is prepared by our company, after that it is submitted for the approval of customer. After the approval of customer, service and production process start. Communication with our customer is continued until the final product or service delivery. Support and maintenance service is provided to our customers for possible errors. Our services and products are guaranteed for 2 years. All processes are carried out by our experienced team members.

It is our duty to add VALUE and ENERGY for your experience with our company ...

- Environment and Sustainability Policy**

We minimize the damage to the environment during the production stage of our products by preferring environmentally friendly materials. We inform our environment and our employees about the value of our energy and our environment. We provide awareness about this topic. We make our production facilities fully equipped for energy saving.

As an energy company, our most important aim is to be aware of clean energy production and create an awareness about it ...
